LB 21

ask it at this time.

PRESIDENT: Senator Cullan, will you yield? You are next. Senator Wesely, do you care to answer questions or ask questions.

SENATOR WESELY: Senator Schmit has yielded to me.

PRESIDENT: Very good.

SENATOR WESELY: Senator Schmit, I did point out the letter. I just got a copy last night myself which raised some more or less technical questions involving the bill. Although the NRC does support the concept and the intent, it appears that there may be some need to look at some amendments and I wondered, Senator Schmit, would you be willing to meet with the NRC and talk about this, and perhaps come up with something for Select File?

SENATOR SCHMIT: Yes, I would, Senator Wesely. I believe that the questions raised by the Natural Resources Commission are indeed technical. They are not substantial. I see no real objection to those, and if you would like to meet with myself and members of the Commission sometime between now and Select File, I am sure we can work that out.
